LED Outdoor Flood Light Fixtures

The LED Outdoor Flood Lights are efficient, energy saving replacements for metal halide and halogen fixtures. The outdoor fixture can mount at a broad range of angles.

LED outdoor flood light fixtures are ideal for wet locations. Perfect for up or down lighting, for wall washing, flagpole, landscape, security, driveway spotlight or area floodlighting.

Perfect for commercial & residential use

FEATURES:

- Replaces 100 watt halogen through 175 watt metal halide fixtures
- Compatible with mechanical relay type Photocell & occupancy sensor
- 50,000 hours of maintenance-free operation to L70 at 15 degrees C
- Tempered glass lens, thermal shock and impact resistant
- Constructed without any hazardous materials
- Die-cast aluminum housing and lens frame
- Universal 120 to 277V, 50/60 Hz driver
- LED Daylight at 5,600K
- Silver powder-coat finish
- 3-year warranty

CONSTRUCTION:

- Cooper plating provides high thermal transfer rate, minimizing the junction temperature of the LEDs.
- Heavy duty cast aluminum twopiece housing is polyester TGIC powder-coated for long durability, rust and corrosion resistant and IP65-rated to seal out water, dust and insects
